Tuesday 8th January 2019

UK to commence 60 % Carbon Rations

Written by Saci Lloyd

GOVERNMENT sets date in an historic parliamentary speech, the Prime Minister announced the date of full UK entry into a nationwide carbon rationing system. As of January 8th 2019, the UK will be the first nation state in the world to try the system.

WHAT DOES IT MEAN ? CARBON CARD FOR ALL CITIZENS 200 POINT LIMIT PER MONTH

ENVIRONMENTAL leaders from around the world have reacted with joy to today's events. They considered that it was a major act in the fight against global warming and climate change.

It was of course, intended to answer the crisis caused by the apocalyptic Great Storm of December 2017 (picture below).

An unprecedented environmental disaster: the week-long storm is estimated to have caused 8,000 deaths and destroyed 2.5 billion hectares of agricultural land, 6 million homes and 40,000 businesses.

At the heart of the legislation is a commitment to ensuring levels of CO₂ in the atmosphere do not rise above 450 parts per million, which is the limit before irreversible global climate change happens.

The Carbon Card system will be nothing short of a total grassroots fuel revolution for every citizen. Former American vice-president and environmental campaigner Al Gore has given an immediate positive reaction to the announcement: "Finally the Queen and the Prime Minister have taken a lead. It is now imperative that all Europe follow."

Prince Charles and Al Gore at the Paris Climate Accord in 2015.
